Eurolite is a protected trademark of Behr Angelsport, Germany. **Eurolite chemical lights** are of very high quality and they are made under specific quality management. The production is controlled by Behr staff from the very beginning of production until the goods are loaded in the container. Eurolite are the only chemical lights on the market which are made of vegetable solvent. They are absolutely safe and unobjectionable for human and environment. A safety-certificate according to EU standard § 91/155/EWG is available and approved by the "TÜV Rheinland". The glowing time of each Eurolite is at least 12 hours and the **durability is more than 2 years**. If stored cool and dry.
