

# Jenzi Polaris Float Peacock

Jenzi

Product number: JE-665500X

Super sensitive bait indicator for every depth.

0,00 €\* 0,00 €

Polaris is the super sensitive bite detector for bottom angling – by fast locked floats.

- for ever depth of water
- no need for a stop knot
- holds fast in the desired depth
- withstands waves and drifting
- perfect depth gauging
- an absolute must-have for lakes and slow rivers

## Manual

- Pull the main line through the Polaris system. Attention: There are 2 line guides available!
  - small - up to 0.22mm line diameter
  - big - from 0,25mm line diameter
- Attach food basket or ground lead, preferably with a spacer, in front and behind each a pearl
- Fit the hook and eject it to the desired position
- When the assembly has dropped to the bottom, give as much line until the float sticks out of the water
- Close the bail and crank until the line is taut so that all bites are clearly displayed.
- If the Polaris pose reaches the top guide while drilling, just crank futher
- In order for Polaris to function perfectly, a certain weight (lead or feed basket) must be mounted on

the assembly, depending on the type of float
