FeelFree

Product number: FFK-L2TV2-OR

Lure II Tandem with improved equipment and parts for the Overdrive System.

2.699,00 €* 2.699,00 €

The new Lure II Tandem V2 Overdrive Ready offers you the ultimate platform for the perfect paddling and fishing experience. All components required to equip the **separately available [Overdrive System](#)** are already assembled, so that the Overdrive System only has to be mounted to experience the next fishing adventure. In addition to the 8-ball hand steering and the rudder, the additionally assembled components also include the seat adjuster, the mounting block and 8 scupper plugs. The sonar pod and footrests are **not** included, since these components cannot be installed simultaneously with the Overdrive System.

Based on the same amazing comfort, stability and versatility anglers demand out of a kayak – only x2! With 2 complete cockpits featuring the removable sonar & electronic sonar pod in front, standing platforms and patented Gravity Seats, the Lure II cuts no corners to offer the best for two anglers. The kayak also comes with a variety of unique features seen on the Lure series including the patented Wheel in the Keel and sturdy molded in handles. Like most Feelfree kayaks, the Lure II comes with everything you need to get out and go fish including the Uni-Track system for unlimited outfitting configurations, flush mounted rod holders and a large tankwell to store your fishing gear or a cooler. What sets the Lure II apart from other tandems is the multi-configuration options. Paddle with a friend or family member, one can control the boat and keep an eye on the fish finder while the other fishes and vice versa. The Lure II can also be paddled as a solo kayak from the rear seat position – with a multitude of options. In the solo position, you can remove the front Gravity seat providing even more room for standing and storage, add a stand up bar to sight cast or cooler to sit on. Stand, sit high, sit low, one or two anglers, pedal*, paddle, power* and go fishing, the Lure II will be the one boat that can truly replace them all.

***Overdrive, Motordrive and Rudder systems sold separately.**
