Musky Innovations Twin Fin Softbait

The TWIN FIN is approximately 10" long and 7 oz. It is an all soft plastic double-tail lure that can be cranked, jerked, or jigged. It is extremely versatile and runs 8 to 12 feet on a steady medium retrieve. Can be fished to over 50 feet whilst down-rigging or trolling. It is made with a balancing jig head and solid wire construction to hook and hold the big one. The extra large twisting action tails never stop moving, even on the drop, make it irresistible. It is available in a large range of exciting colours.
