The B'Freeze / Pointer has been designed with a very low center of gravity through the use of special brass weights. The low center of balance causes the lure to wobble and vibrate whenever the retrieving motion is stopped. The B'Freeze / Pointer will suspend 0,5 m deep and will emit an intriguing fish-calling vibration, while in the suspended state. A short twitch of the fishing rod will generate the "Walk the Dog" action under the water.

The Pointer - B'Freeze is a revolutionary jerkbait design. By animating it with short blows of the scion, you can admire its devastating swaying, perfectly simulating an injured or dying fish. Its low center of gravity allows the Pointer - B'Freeze to vibrate and sway even when the recovery is stopped and the lure is stationary. Among the many models and colors of the Pointer - B'Freeze, you will easily find the lure that perfectly mimics the type of forage fish found in your waters. A blend of action and imitation that makes the Pointer - B'Freeze a classic in lure fishing.
