"SW stands for Salt Water" - all Pointer fans take note. Lucky Craft has now added another new pointer minnow to its repertoire. The new SW Pointer 78 SP is optimised for salt water, but it can be used just as well in fresh water.

The B'Freeze / Pointer has been designed with a very low center of gravity through the use of special brass weights. The low center of balance causes the lure to wobble and vibrate whenever the retrieving motion is stopped. The B'Freeze / Pointer will suspend 1,2 - 1,5 m deep and will emit an intriguing fish-calling vibration, while in the suspended state. A short twitch of the fishing rod will generate the "Walk the Dog" action under the water.

The abbreviation "DD" or "Deep Diver" literally means great diver. This swimming depth is obtained thanks to a longer bib specially designed to maintain the inimitable swimming of the Pointer - B'Freeze. With this bib, the Pointer - B'Freeze will swim twice as deep as a Pointer - B'Freeze of the same size with the standard bib.
