Megabass

Product number: MB-VOT-1JR

Small version of the Vision OneTen Jerkbait with up to 2,2m running depth

0,00 €* 0,00 €

The legend is now bite-sized.

The VISION ONETEN+1 Jr. Jerkbait brings snack-sized, irresistible darting action to new depths. Tuned to match the suspend settings of the Bassmaster Classic winning VISION ONETEN+1 Jerkbait, the smaller Jr. size is a wildly effective tool to attack the key 7ft range. No detail has been spared. From the first twitch, the Jr. exhibits the same unrivaled, dynamic action that catapulted the ONETEN series onto the front deck of serious Jerkbait anglers.

The ONETEN+1 Jr. delivers mesmerizingly erratic jerking action. With a straight retrieve, it exhibits high pitch rolling and seductive flash. With a tungsten Multiway Moving Balancer System (PAT.) for superior cast distance, sticky-sharp trebles to capture hard-won bites, and a hand-painted artisan finish, the VISION ONETEN+1 Jr is built to match smaller forage and/or entice pre-spawn targets that follow the larger VISION ONETEN without committing.
