There are a lot of lures on the market that look like a crayfish sitting still, but in the water they don't move like a real crayfish. The Clackin' Crayfish has the look, moves and sound of a real crayfish. Like a real crayfish the Clackin' Crayfish swims backwards and makes a clacking sound with its tale, just like in nature. This natural move and sound is what catches the nicest pikes, zanders and perches.
