

Delphin Ring Bite Indicator suitable for bend lighting

Product number: DLP-RBA

Easy and affordable bite alarm with the outer diameter of 80 mm made of resistant material.

1,99 €* 1,99 €

A permanent chemical light can be fitted in its transparent part to provide better visibility while fishing at night.

We use such bite indicators at night with a bending light. When the mount is laid out, we open the reel and hang the ring in the line. And with that we detect every careful bite. Simple and good.
