

Behr Neoprene Waders High Back 4mm green with Chest pocket

Behr Angelsport

Product number: BA-W4MHB

High back model with robust and non-slip profile sole

99,99 €* 99,99 €

These new high back waders are made of the best 4 mm thick neoprene. The difference to our other models lies in the boot. This is not designed with neoprene in these waders, which makes the waders cheaper. All seams are double welded and sealed. Like all high back waders, the back is pulled up for optimal use of the water depth, so you can be even closer to the fish. The waders have a breast pocket and two patch pockets on the left and right. The waders are completely waterproof. Every single piece is checked for leaks in a so-called water bath before leaving the factory. Delivery in a plastic bag.

- High back model with robust and non-slip profile sole
- With flexible Velcro straps
- Breast pocket with Velcro fastener
- Two handwarmer pockets
- 4mm high quality neoprene, double coated, as used in diving for dry and wetsuits
- Double-welded seams processed in the so-called "blind stitching" process
- 100% waterproof
- Material: 90% Neoprene, 10% Nylon
