

Matrix Evolution Power Grip Method Feeder

Matrix

Product number: MA-GFR-PG

0,00 €* 0,00 €

The Matrix Evolution Power Grip Method Feeder is a new developed, very tough feeder. With its new Grip Design the food is jammed very tight and even resists stronger streams.

The Matrix Evolution Method Feeders have been designed to meet the latest needs of match anglers. Now with the Power Grip design to give the moulded bait more grip to help withstand harder casts or for use in deeper water. With its quick change line slot and removeable tail rubber changing between feeders has never been easier. We recommend using a Matrix Rubber Quick Bead to secure the hooklength to the mainline.
