Perfect for paddlers and anglers of the salt-water variety, the NRS Titanium Neko Blunt Knife is constructed with corrosion-resistant titanium and features smooth and serrated edges, a blunt safety tip, and an integrated bottle opener.

- Compact and low-profile in design with titanium construction creating a knife that's lightweight, stronger than steel and holds a sharp edge
- The hybrid blade includes a serrated section for quickly cutting rope and webbing, plus a razor-sharp smooth section for finer cutting
- A low-profile, friction-release sheath holds the knife securely while allowing for fast one-hand deployment
- The sheath clip attaches firmly to your PFD lash tab
- The contoured handle with rubberized grip gives you maximum control of the blade
- Blunt safety edge prevents accidental punctures (and evenly spreads condiments on sandwiches at lunchtime)
- Features an integrated bottle opener and valve wrench for an oxygen tank
