

Jenzi UV Marker Pen with black light ink

Jenzi

Product number: 8113 002 6,95 €* 6,95 €

Jenzi UV Marker Pen with black light ink. The innovation in the fishing sector. Europe EXCLUSIVE only from Jenzi. Researches have shown that fish are attracted to ultraviolet radiation and are very sensitive to this. Pretty sensitive fish like salmonids. Catches our team anglers were astounding. For testing a group angler was sent with UV MARKER and a group without fishing. The result was overwhelming. While anglers without "UV tuned bait" came back with a very little fish, the fishermen had the UV MARKER full fish baskets.
