Jenzi Tasty Gums Tungsten slotted beads - Optimise your spin fishing experience.

Looking for a way to take your trout fishing to the next level? Discover the **Jenzi Tasty Gums Tungsten beads**. Designed to work in perfect harmony with rubber fish hooks, these beads allow you to precisely control the running depth of your trout softbait. Simply threaded onto the hook in front of the rubber fish, they expand your adjustment options and improve your catching performance.

Made from Tungsten, an environmentally friendly alternative to lead, you benefit from the compact size and low water resistance of these beads. This means faster sinking speeds and longer casting distances - ideal for ultra-light spin fishing for trout. The Jenzi Tasty Gums Tungsten beads are available in a range of weights, diameters and colours so you can find the perfect bead for any situation.

For mounting the Tungsten beads we recommend the specially designed TASTY GUMS trout hooks. They feature an end of the hook shank that is bent inwards by 45 degrees, which makes mounting easier. And that's not all: these tungsten beads are also ideal for constructing flies when fly fishing.

Features of the Jenzi Tasty Gums Tungsten beads:

- Perfect combination with rubber fish hooks
- Increased casting distances and fast sinking speeds thanks to low water resistance
- Environmentally friendly tungsten construction
- Available in different weights, diameters and colours
- Easy to install thanks to slotted design and combination with TASTY GUMS trout hooks
- Multifunctional: also suitable for building flies when fly fishing

With the Jenzi Tasty Gums Tungsten beads every fishing trip is a potential adventure. Trust in Jenzi quality and discover how these beads can improve your fishing.
