

## Queen Predator leader transparent 4-times braided

**QUEEN.**  
OF FISHING LINE

Queen

Product number: QU-4T-BR

Extreme tearproof but still smooth predator leaders made in Germany.

0,00 €\* 0,00 €

Predator fishing without steel? - By now unthinkable for most anglers. The Queen of Fishing Line shows that it works without steel. And even better.

These exceptional predator leaders consist of three or four interwoven monofilament single strands, depending on their load capacity. In contrast to steel, they are not only smoother and much less noticeable, they also have incredible abrasion and tear resistance, which is absolutely essential for predator fishing.

Due to the wide range of load capacities (10kg, 15kg, 20kg, 25kg, 30kg, 40kg and 70kg) and lengths (30cm, 45cm and 70cm) you will find the right leader for each predator.

For those who prefer to build their own leader or to create fear hook systems and complete mounts, the predator leaders are also available by the meter in 5m length.

Queen of Fishing Line produces their predator leaders only by hand and 100% in Germany. Only the best swivels and carabiners in brand quality are used.
