

Jenzi Flounder Spoon mounted 110cm UV Blue White

Jenzi

Product number: JE-5074XX0

Fully assembled, UV-active lure spoon for flatfish fishing.

from 4,50 €* 4,50 €

UV-active flounder spoon mounted on attractive leader.

This lure spoon for flatfish and sea fishing is mounted on a completely finished leader (swivel, hook, spinner blade, line and light beads). The different color options and the luminous beads increase the attraction for the fish.

Let the spoon sink to the ground - lift the rod tip and retrieve 2-3 reel turns and repeat. The resulting dust cloud makes the fish curious and creates a lure. Available in three different weight classes and 6 color options.

Diameter: main line 0,50 mm, side arms 0,40 mm

1pcs./SB packed on practical EVA board
