Fox Submerge Braided Fishing Line Sinking Orange

With its bright orange colour, Fox Submerge Braided Fishing Line offers exceptional visibility by day and night. This unique feature allows anglers to easily recognise their lures and lines even in murky waters. The increased sink rate ensures that the line sinks even faster, which is particularly advantageous when fishing in deeper waters.

Thanks to its improved smaller diameter, this braided line enables greater casting distances, which can be crucial for reaching hard-to-reach places. Despite its robustness, the line is ultra-soft and offers great abrasion resistance, even in obstacle- and plant-rich waters.

The Submerge fishing line has virtually no stretch, which enables optimum bite indication and allows the angler to react quickly to the strike. This minimises the risk of the fish coming off the hook.

Features:

- Bright orange colour for good visibility
- Fast sink rate for effective fishing in deep waters
- Smaller diameter for greater casting distances
- Ultra soft and abrasion resistant
- Virtually no stretch for optimum bite indication
- Suitable for waters rich in obstacles and plants

With the Fox Submerge braided fishing line you have the perfect tool for successful fishing in different waters and conditions.
