

# Daiwa Baitcast Reel Tatula TWS

Daiwa

Product number: DW-TWS300

High quality baitcasting reel for bait weights up to 140g.

0,00 €\* 0,00 €

With the Tatula TWS 300 DAIWA for the first time offers a left handed baitcasting reel with size 300, which has been particularly developed for the use of large lures and strong braided lines. The double stopper design reliably prevents the anti-reverse from turning free at very cold conditions and at extreme strain. The perfect reel for targeting large pikes in springtime in shallow waters with XXL shads using the shallow-screw system. Suited for lures up to approx. 140g.

The Tatula TWS 300 offers remarkable 13kg drag power! The XSL features a drag power of 11kg.
