With the Emblem 35 SCW DAIWA relaunches a legendary Big Pit reel for carp fishing. Especially the innovative Slow Cross Wrap line lay (SCW) cares for frictionless casts and thus optimum casting distances. The extra-thick and distortion-proof stainless steel axis offers highest security at the fight, particularly over short distances, when large specimen have to be directed to the landing net. The Digigear II cares for a silky-smooth running and offers optimum power transmission and remarkable 106cm line retraction per winding.

The QD drag system allows you to react to changing fishing conditions within seconds. The spring-loaded HIP line clip spares the line and is perfectly suited for repeated and precise targeting of your feeding spot.

- 6 ball bearings
- AIR ROTOR®
- Quick drag system (QD®)
- DIGIGEAR® II
- Infinite Anti-Reverse®
- SCW (Slow Cross Wrap™) system
- Silent oscillation system
- Conical aluminum longcast spool
- Aluminum spare spool
