The Daiwa **Zillion TW HLC 1514SHL** (HLC: Hyper Long Cast Custom) features a special Magforce-Z drag system, which has been tuned to enable an ultrafast rotation of the spool – double as fast as at a conventional Zillion reel – thus enabling optimized casting distances.

This reel comes into play from casting weights of 14gr and above. Perfect for Carolina and Texas rigs. The T-Wing system additionally cares for an optimal casting performance. The Magforce-Z magnet drag easily can be adjusted according to the used lure weight to guarantee trouble-free fishing fun.
