Dogfight - this literally stands as synonym for the fight against the giants of the sea, since the Dog Fight represents highest fighting power and durability.

Now many important details of the **Saltiga Dogfight 8000H** have been improved to maintain its superior performance even longer. The Saltiga Dogfight 8000H is even better protected against the intrusion of salt water and corrosion! In addition to the well-known MagSealed construction and the sealing of the main axis, also the side axis is completely sealed with MagSealed ball bearings. Thus, the axis is sealed to both sides, which perfectly shields the gear against water intrusion. The line roller is also sealed by MagSealed technology for a considerably prolonged lifespan. Especially the line roller frequently has ultimate contact with salt water and dirt particles - here the MagSealed ball bearings offer the proper protection for permanent employment.

The high line capacity offers enough space for extremely thick braided lines. The maximum drag power of 30kg sets the basis to successfully fight the fish and to direct them to the boat. Especially in extreme situations, the ATD drag system provides the necessary security to instantly hook and land the fish. Compared to conventional drag systems, the ATD drag features no elevated starting resistance and continually maintains the chosen drag power - another milestone regarding reel construction.

Technological features

- MAGSEALED® body construction
- MAGSEALED® axis ball bearings
- MAGSEALED® ball bearing at the line roller
- HARDBODYZ® aluminum reel body
- 13 ball bearings (incl. 3 MAGSEALED®, 2 "CRBB®" and 8 normal ball bearings)
- ZAION® AIR ROTOR®
- AIR BAIL®
- Waterproof ATD™ drag system
- Hyper DIGIGEAR®

- Infinite Anti-Reverse®
- Twist Buster® II line roller
- Machined ABS® II aluminum spool
- CNC cut aluminum handle
- CNC cut handle knob
- Silent oscillation system
- Rotor brake
- Manual bail return
- Made in Japan
