

Daiwa spinning reel Ballistic LT

Daiwa

Product number: DW-BAL-LT

The new LT concept (light & tough) of the Ballistic makes it lighter and stronger than the previous models.

0,00 €* 0,00 €

The **17' Ballistic LT** is based on the new LT concept (Light & Tough) from Daiwa. The new LT reels are distinctly lighter and at the same time offer more retrieving power than the previous models. The dimensions of the reel body have been scaled down while the retrieving power even is improved by the new drive construction. The distortion-proof Zaion reel body cares for a safe housing of the drive and supports the low weight of the reel. The ATD drag system cares for an evenly scattered drag power without starting resistance. The CNC cut aluminum handle is firmly screwed at the driving wheel, leaving no room for gaps. The MagSealed system prevents the intrusion of water via the shaft – perfect for sea fishing – while the milled Tough Digigear drive supports optimal retrieving power and permanent durability.

The drag power has been additionally intensified by the new design – the 2500/3000 sized models offer a maximum drag power of 10kg, the 4000/6000 sized models enable up to 12kg and the smaller models up to 5kg.

Size 6000 is delivered with a power handle knob, which is especially handy at high strains – perfect for light jigging or feeder fishing.

Technological features

- LT (Light & Tough)
- ZAION® body
- MAGSEALED® body construction
- 6 ball bearings (incl. 1 „CRBB®“)
- AIR ROTOR®
- CNC cut TOUGH DIGIGEAR®
- ATD™ drag system
- Infinite Anti-Reverse®
- Cross Wrap™ system
- Silent oscillation system
- Aluminum Air spool

- CNC cut aluminum handle
- AIR BAIL®
- Twist Buster® II line roller
