EXCELER LT

The Exceler LT series convinces both by its calm and silky-smooth running and its low weight. The new LT concept cares for an even more secure housing of the gearing combined with elevated retrieving power and optimized drag power. The new design of the driving wheel enables higher power transmission and enhances the durability while the ATD drag cares for an instant working of the drag and offers optimum drag power.

Drag power: 1000/2000: 4.0kg, 2500/3000: 10.0kg, 4000/6000: 12.0kg

Size 6000 is delivered with a power handle knob, which is especially handy at high strains – perfect for light jigging or feeder fishing.

Technological features

- LT (Light & Tough)
- DS5 reel body
- 5 ball bearings
- AIR ROTOR®
- TOUGH DIGIGEAR® Getriebe
- ATD™ drag system
- Infinite Anti-Reverse®
- Cross Wrap™ system
- Silent oscillation system
- Aluminium Air Spool
- CNC cut aluminium handle
- AIR BAIL®
- Twist Buster® II line roller
