

Daiwa Spinning Reel Ninja LT

Daiwa

Product number: DW-NNJ-LT

The follow-up of the Ninja A - lighter, softer, better!

0,00 €* 0,00 €

The Ninja LT is the sequel of the legendary Ninja A. The Ninja LT convinces optically as well as technically. The ultra-smooth and even running is a real highlight. Due to the integration of the LT concept, the DAIWA engineers succeeded in reducing the reel's weight significantly. Thus we could realize a reduction of weight of over 10% within the size 2500.

The novel Tough Digigear, which has formerly been used within much more expensive reels, equips the Ninja LT series with an improved power transmission and an even smoother running compared to the previous version.

The integrated ATD drag within the Ninja LT provides a distinctly stronger drag power (up to 10kg) and an immediate functioning of the drag without starting resistance – ideal for application with thin lines during critical fights with the fish. With the Ninja LT DAIWA presents a novel and optimized sequel of the globally successful.

- LT (Light & Tough)
- 4 ball bearings
- AIR ROTOR®
- TOUGH DIGIGEAR® (TDG)
- ATD™ drag system
- Infinite Anti-Reverse®
- Cross Wrap™ system
- Silent oscillation system
- ABS® aluminum longcast spool
- CNC cut aluminum handle
- Twist Buster® II line roller
