The **Emblem BR 25A** represents freespool reel construction at its finest! The concept with a 25mm spool stroke enables the construction of a compact and lightweight reel, which combines the longcasting-benefits of a Big Pit reel. Due to the lighter weight you even can cast more precise and controlled compared to heavier Big Pit reels! The big spool diameter enables extremely long casting distances and – in combination with the transmission of 5.3:1 – a line retraction of more than one meter!

Additionally, the manual bail turn reliably prevents an unwanted turning during the cast, which can lead to the loss of your rig at powerful casts. The freespool mechanism is extremely sensitive and can be perfectly adjusted to all kind of external influences (wind, current, etc.).

Technological features

- 6 ball bearings
- AIR ROTOR®
- Infinite Anti-Reverse®
- DIGIGEAR® II
- Finely adjustable free spool
- AIR BAIL®
- UTD drag system
- HIP line clip
- Twist Buster® II line roller
- CNC cut aluminum handle
- Soft-touch handle knob
- Longlife bail spring
- Manual bail return
