Bullseye

Product number: BE-PJB

Perfect rod for jerking and pelage!

from 249,00 €* 249,00 €

It's hard to believe, but our PelaJerk 198 with a weight of less than 200g can be loaded with 9kg at an angle of 90 degrees, which is twice the weight of well-known vertical catfish rods! We have already caught catfish up to 2m with

In times of photo-realistic echo sounders, boat, kayak and belly fishing, jerkbait fishing has become a huge topic. Until now, there were no suitable rods for this technique and one always had to make a compromise. Since then, jerkbait fishing has been celebrating a renaissance thanks to YouTube formats such as Fly vs Jerk and Pikefight! In the last 2 years Bullseye has taken on this topic and developed the perfect rod for these techniques!

When we design a rod for a specific fishing technique or target fish, we tweak it until it meets our requirements 100%, and if it looks this elegant, we are even happier with the result. The Fuji ECSM reel seat offers direct contact with the blank and a very direct transmission. For transport, the rod can be detached in the hand section. Of course, we also rely on the proven quality of the Fuji K SS AL ringing for this model, the rod is ringed 9+1.

- Super slim lotus weave composite -36 tone blank
- 9+1 Fuji Alconite K-Guides
- Fuji ECSM Reel Seat with high quality EVA
- Perfect balance without extra weight
- Short handle for better handling
- Best quality
- Functional design
