

Gunki Chooten Cut Sharp C Baitcasting Rod

Gunki

Product number: GU-527XX

Discover this range of tactical baitcasting rods each with a specific power rating and designed to cover the most technical of tactics.

from 205,99 €* 205,99 €

We have worked hard to perfect the handle design that optimises comfort and feedback from the blank. Each rod is steely, accurate and responsive.

200M: Great prospecting rod for a range of power fishing tactics using hard lures such as small cranks, top water lures, longbills, spinnebaits and bladed jigs like the Gennaker and Boomer. Fishes soft baits equally well and the short handle is ideal for the float tube angler.

168MH: Our vertical fishing experts have developed this hybrid rod to cover classic vertical tactics and open water fishing from boats. Based on the Chooten 183 MH, this model is longer and a little more powerful. Light and well balanced, the blank will handle bigger fish and give maximum pleasure!

205MH: Developed for classic lure fishing where accuracy is the key to success. The responsive blank has a fast tip action blending into progressive power lower down. Perfect for small to medium soft and hard baits.
