Based on Jenzi's experience in more than 20 years of rod construction, more than 10 years of catfish rod making and closely associated with over 30 years of fishing experience of Jenzi team anglers Armin Adam and Benno Korak - the Unique Catfish rod series has been developed. After many hours of work on the design and a vast number of sample rods that had to be made, Jenzi has managed to meet the high expectations of the teamers and to create a very special rod series. However, the best description for this new rod series is the name "Unique". It should be unique and special, and that's what it's all about.

Vertical fishing requires optimal bait control. With the new Siluro Special Unique Boat Jenzi complements the range with a 2-piece uptide vertical rod of the top class with small transport dimensions that leaves nothing to be desired. Powerful and yet sensitive in the tip.

The continuous grip made of non-slip EVA Duplon as well as a comfortable forward grip give a secure grip in the fight.

Tip: The Jenzi team anglers like to fish this rod in combination with a Fireball system.
