

Daiwa Freams Sea Trout Fishing Rod Seatrout

The Freams series has been especially designed for fishing for sea trouts. The extremely lightweight and fast blank (3.05m – 155g!) features an exceptional handling and enables permanent fatigue-free fishing. The tip section fully loads during the cast and catapults spoons from 20g to 30g to extremely long distances. The handle section offers enough power reserves to tire even big specimen. The V-Joint spigot joint in combination with the X45 blank construction cares for an optimal bending curve and targeted casts.

Daiwa Freams Features:

- HVF® carbon fiber blank
- X45® carbon fiber construction
- V-Joint® put-over joint
- Exlusive DAIWA® reel seat
- EVA handle
- Exclusive transportation holdall
