Ballistic-X Sea trout

After the great success of the Ballistic-X spinning rods, DAIWA now expands this series with 4 models for fishing for sea trout for the season 2017.

The seatrout rods feature a fast tip action, which catapults spoons and stick baits to enormous casting distances. During the fight the action opens up to a semi-parabolic bending curve, which absorbs sudden flights and headbutts perfectly. Thanks to this action the Ballistic-X Sea trout is ideally suited for the use with both braided lines and mono lines. The rods feature a very convenient handling and are equipped with original Fuji guides and the Fuji reel seat, which is exceptional within this price range.
