

Daiwa Feeder Rod Exceler Feeder

Daiwa

Product number: DW-EXCL-FDR

Perfectly balanced, lightweight feeder rod series.

0,00 €* 0,00 €

The Exceler feeder rods have been developed for fishermen, who are seeking a premium and well-balanced light feeder rod. Despite the slim blank diameter these rods feature a strong backbone with fast action, which enables directing even large specimen securely during the fight.

The three method feeder models (up to 80g) are perfectly suited for the increasingly popular light feeder fishing in silent waters or at low current.

The three medium-heavy models on the other side allow also the use of feeders up to 125g.

Also available are two HQ versions with a casting weight up to 165g.

- HMC+® carbon fiber blank
- Thin and lightweight blank design
- Shrink tube handle
- Fuji® reel seat
- Titanium oxide guides
- 2 quiver tips
