

Gunki Chooten Cut Supersize S Spinning Rod

Gunki

Product number: GU-162XX

Range of spinning rods designed for the specimen hunter.

from 223,99 €* 223,99 €

No detail has been left to chance so you can tackle up to target the biggest fish with total confidence in your rods. The ergonomic handles are designed to be comfortable to fish with and play big fish securely.

Technical and powerful rods that can be fished with ease all day long.

240H: Designed for bank fishing when prospecting big, open waters or deeper venues. Targeting pike on gravel pits and big lakes or zander in big rivers, for example. Casts well and is comfortable to fish with thanks to the ergonomic cork handle.

225XH: In our SPECIMEN SPINNING series this is one of the stronger rods on offer. The power, balance and length are designed for pike fishing with larger lures (SCUNNER, OTACHI, GUNZILLA 190, GBUMP 170, KING GAMERA...etc). Despite its power, the blank is light and easy to handle- perfect for fishing round weedbeds and tree lined margins. The length helps when distance casting is required and the sensitive tip reads the bottom accurately.

205XH: Jerk rod designed for anglers who don't use baitcasting reels. Powerful and resonant, this deceptively short rod excels when fishing at long range. The fast-regular action and the handle length are designed to let you alternate between underarm pitching casts around the edges and full blown double handed casts into open water. A great rod for the wading or float tube angler.
