Illex

Product number: IL-27431

Huge pike, catfish and tropic fish on target? This is your rod.

Weight: 0.289 kg  
449,00 €\* 449,00 €

The Night Shadows B 230 XXXH The Ghost Dog has 2 years of development behind it. The goal was to build a baitcasting rod that manages to catch XXL predators with real XXL hard and soft baits under the most difficult conditions. The Ghost Dog can lure artificial baits up to 300g weight, while trolling even 400g are possible. The ultimate rod for large rivers, large lakes or reservoirs and specimen hunting throughout whole Europe. A fiberglass portion in the blank makes the action softer during the drill, effectively reducing choppers, but also helps to compress the blank more strongly for longest casts. Built with top quality FUJI components: Alconite K anti-tangle guides and ACS roll holders. An extra EVA handle above the roll holder provides extra comfort and a secure grip while drilling. Delivery in the embroidered case.
