Jenzi Sea Rod Tagora Sunrise

The masterpiece of the COMPETITION series

The ultra-thin and stiff FSP High Carbon Blank was designed to release explosive like power during the cast. This makes the long casts possible, which are often decisive when surf casting. The specially tailored long cast handle makes it possible to employ different casting techniques and sinker weights. Alongside the noble design, such components as the Fuji screw-on reel holder, Fuji Alconite KW Tangle Free Guides, and a white finished rod tip where incorporated. A padded carry case for damage free transport is included with this rod.

- Fuji Reel-holder
- Fuji Alconite KW Tangle Free long cast guides
- Ultra Strong HMC-Carbon Construction
- Noble design
- Delivered with padded carry case
- White top-quality tip
