

Jenzi Spinning Rod Nakashima 2,40m 5-20g

Nakashima – This handcrafted rod series, which has been tested by our predatory fish professionals over an extended period of time, represents Japanese design, trendsetting style, and sensitive bitedetection. Constructed using the newest of components as well as an integrated fluorescent fiberglass tip, allowing for a natural and precise bait presentation. The components allow the Nakashima rod series to be ideally utilized for drop-shot, vertical – as well as a light spin-rod. Thanks to the further developed FSP Fast – Sensitive – Powerful High Carbon Material, the new "High Quality" blank is even more powerful and faster than ever. Complimenting the Flatblack look are the stylish and modern red-silver accessories and the integrated fluorescent fiberglass tip.
