Kamloops Stinger 673 - GH67-3LS

The Kamloops Stinger is Yuki Ito's personal model. Designed for a long distance approach in highly-pressured fields, upstream casts, and long drifts while wading, the 6'7" length allows the angler to maintain distance and cover wider areas to trigger elusive bites.

With a high frame K-Guide stripper guide, the GREAT HUNTING's original guide setting delivers the casting performance of a traditional 7' model in a shorter frame, for increased efficiency.

Tip section is equipped with STINGER TIP technology, an advance first developed for the Destroyer and Hedge Hog series to capture subtle short bites.

The KAMLOOP's blank is finished with YOLOY to add an additional layer of protection against scratches and damage that can occur in the wilderness.
