

Bullseye Beast 275 2,75m 45-90g Spinning Rod

bullseye

Bullseye

Product number: BE-B275

In close cooperation between our guide Marcel Wiebeck, the Beast 275 was developed in a two-year development process, which is not only tailored exactly to him, but above all acts perfectly on the water.

Weight: 0.189 kg
319,00 €* 319,00 €

The aim in developing the Beast 275 was to find the perfect mix of hardness, speed and feel, which immediately turns into complete control and fun in the fight. We are pleased to finally be able to offer you this top class rod at an affordable price despite the highest quality components! The action of the Beast 275 changes under full load from a semi-parabolic action almost completely to a parabolic action - so you never have the feeling of losing control in the fight with big fish. Another decisive advantage: The amount of fish lost in the fight is almost zero! Even tightly hooked fish very rarely slip out. The reason for this is the springiness of the blank, which sensitively cushions the head impacts of the pikeperch - or catapults every rubber fish into the distance like a ball hit by a golf club!

The rod for shore fishing for zander or pike.

As a passionate zander angler on the Elbe, it was not only important for Marcel to develop a rod with enough power, but also with the necessary hardness. This rod should be able to be fished sensitively with 10 gram heads and small rubbers, but not buckle when it gets coarser. Even with 30 gram jigs and 16 centimetre rubber fish, you never have the feeling that you are overloading the rod. The rod can handle big 23mm rubber fish on a jig without batting an eyelid! This not only makes the rod the focus of every zander angler on the river, in the lake or in the canal - pike anglers will also find the "BEAST" a true dream rod when it comes to presenting large lures with precision.

- Length: 2,75 Meter
- Casting Weight: 45 – 90 Gramm
- Transport Length: 1,38 Meter
- Guides: FUJI K-AL Ringe 8+1
- Reel Holder: FUJI VSS
- Weight: ONLY 189 grams light (+ counterweights)

- Features: perfect balance due to exchangeable counterweights + hook eye
- Elegant Design
- Full-length handle with high-quality EVA
- Developed by Marcel Wiebeck
