

Bullseye Milfhunter Fishing Rod

Bullseye

Product number: BE-MHA

The Bullseye Milfhunter rod is a formidable catching machine for fishing with really heavy lures to catch the ultimate pike milf.

from 399,00 €* 399,00 €

The tight and incredibly strong blank is ideally suited for casting lures 20+ at long distances. Perfect hook setting, casting heavy lures and a very direct transmission were the cornerstones of our specifications. The Milfhunter's main discipline is fishing with large rubber fish and swimbaits. In addition, MEGA jerkbaits and large plugs can also be cast and guided perfectly with it.

With this rod, too, we stretched for the absolute optimum during the development and test phase. Many details were adjusted for absolute practicality!

If the ultimate boss hangs here, he has really bad cards!

Features

The Fuji PULS reel seat has the advantage that you no longer have a thread in your hands. This avoids pressure points on the hands. At the same time, the nut is locked on the reel seat and remains in place throughout the season!

The powerful Lotus Woven Composite Blank reliably sets the stroke hard and is up to all situations. The progressive action with a brute backbone parries all escapes with confidence.
