

Hearty Rise Spinning rod Predator III

Hearty Rise

Product number: HR-PRDTR3

Theh perfect allround rod for every intended purpose.

from 329,00 €* 329,00 €

After a year of development Hearty Rise now brings the completely redesigned Predator III series on the market. By using the new NET-V III technology and a brand new FUJI guide set (FUJI SIC-S, K-Series), it has been possible to reduce the weight by approx. 10 - 25 g depending on the model, but with the same ruggedness and durability like the previous model.

The used Fuji SIC-S guide set is further dimensioned so that this rod series can be fished all year round. Consciously, it has been decided not to save more weight at the expense of winter performance.

The Predator III has an ultra-fast taper, an Extreme Power Blank construction with a 1:6 bend ratio. This provides a quick bite response, allowing for easy bait guidance and accurate casting accuracy.

In the optics, detailed changes have been made: the used FUJI SIC-S guide set (the insert is almost half slimmer than the conventional SIC insert) provided with an exclusive gray tone on the guides. This makes the rods even more noble.
