

Illex Ashura Spinning rod Lake Master S 2202 UL Lady Of The Lake 0,5-7g

The Lake Master S 2202 UL Lady Of The Lake is a two-piece spinning rod, designed for fishing with small lures at long range. Often the trouts are further out, then the Lady Of The Lake plays its merits, because the length of 2.20m allows significantly better widths than possible with short spoon rods. The bait control and lure animation also benefits by the plus in length, but also by the sensitive full carbon tip. Thus, this model is also perfectly suitable for drop shot and finesse techniques. Equipped with the latest Fuji components. Rings Fuji Alconite BC. Delivered in embroidered sheath.
