The new ZANDER Wumme does exactly what its predecessor has been doing since 2016. However, it is almost 25 grams lighter! The blank is not only lighter, but also much more sensitive. Compared to Sebastian Hänel's old rod, you can feel the bottom contact much better. The new rod has been modified with robust K-Guides and a slim EVA handle. The efficiency of the ZANDER rod has not changed. The tight blank with a 90 gram casting weight ensures that the hooks penetrate without delay. The hard rod tip transfers the force immediately to the hook tip. That's exactly how Sebastian likes it. "Efficiency is not a matter of taste" - Sebastian Hänel's motto also applies to the new Wumme. In addition to zander jigging, the ZANDER Wumme can of course also be used very well as a pike rod.
