

# Ichikawa Offset Hooks SP

Ichikawa

Product number: IS-OSH-SP

Japanese offset hooks for fat plastic bites.

0,00 €\* 0,00 €

This offset hook is ideal for moving baits like swimbaits, buzzfrogs and soft jerkbaits. The offset area prevents the material from tearing the bait.

You can cast this hook all day long and use it hardest without the bait having to be repositioned. Thanks to the offset area, the hook remains well hidden and when the fish bites, the rubber slips and the hook penetrates easily into the fish mouth thanks to the PTFE coating.

Due to the robust design even very light softbaits can be casted effortlessly. Heavy wire for heavy fish.
