VMC Single Hook 7237B Light Inline - Your Secret Weapon for Successful Catch & Release

Especially for demanding anglers and the sensitive waters where barbless fishing is only allowed, VMC presents the innovative 7237B Light Inline barbless single hook. This hook is the perfect partner for your plugs and is an excellent option for gentle trout fishing.

The hook is lightweight, making it ideal for smaller predatory fish. Designed with a generous eye and standard shank, it offers excellent balance and handling. Its round steel design makes it robust and durable, while its fine-stranded material ensures precise control. With its extra-wide shape and no barbs, this hook is particularly gentle on the fish, making it the first choice for catch & release.

Despite its lightness, the VMC 7237B Light Inline Single Hook is made from Hi-Carbon material, making it incredibly strong and reliable. Its non-set design ensures optimum bait presentation and a secure strike.

Features:

- Lightweight and perfect for smaller predatory fish
