

Ichikawa Treble Hooks Kamakiri Light Wire

Ichikawa

Product number: IS-TBH-KKL

Teflon coated freshwater treble hooks for small plugs and spoons.

0,00 €* 0,00 €

This is the Light Wire version of the Kamakiri, which has the same shape characteristics as the original Kamakiri hooks.

These hooks are designed for smaller baits or when the buoyancy of the bait needs to be adjusted. The eye design helps to maintain the bait effect. The PTFE coating improves the penetration of the hooks.
