Product number: VE-BLSM65

Suitable for battery types: Wet (Liquid), AGM (VRLA), Gel (VRLA), SLA, Li-Ion (LiFePO4)

from 106,99 €* 106,99 €

The Blue Smart IP65 charger is the new professional battery charger with built-in Bluetooth! The charger can be used with devices in your workshop or with motor vehicles such as (classic) cars, motorcycles, boats and mobile homes.

The battery is being charged, intelligently ... until it is in perfect condition.

- The seven-stage charging algorithm gets the most out of your battery. The charger provides the battery with the energy it needs, keeps it healthy, ensures better performance...and a longer life.

Restoration of deeply discharged "dead" batteries.

- Unlike other brands, the Blue Smart IP65 charger will try to recharge a deeply discharged battery by forcing it to use a weak charging current. Normal charging will resume as soon as there is sufficient voltage between the battery connections.

Easy connection of the battery.

- The charger is supplied with alligator clips as well as with M8 cable lugs - making the connection to the battery very easy. You can always leave the device connected if you wish.

Check the status of your battery remotely.

- The Blue Smart IP65 charger has built-in Bluetooth. In this way, the status of the charger and the battery can be checked on a smartphone, tablet or laptop. All settings of the charger can be configured with the VictronConnect app.
