Victron Energy

Product number: VE-BLSM67

Suitable for battery types: Wet (Liquid), AGM (VRLA), Gel (VRLA), SLA, Li-Ion (LiFePO4)

247,99 €\* 247,99 €

The Blue Smart IP67 charger (waterproof) is the new professional battery charger with built-in Bluetooth! The charger can be used with devices in your workshop or with motor vehicles such as (classic) cars, motorcycles, boats and mobile homes.

**The battery is being charged, intelligently ... until it is in perfect condition.**

- The seven-stage charging algorithm gets the most out of your battery. The charger provides the battery with the energy it needs, keeps it healthy, ensures better performance...and a longer life.

**Restoration of deeply discharged "dead" batteries.**

- Unlike other brands, the Blue Smart IP67 charger will try to recharge a deeply discharged battery by forcing it to use a weak charging current. Normal charging will resume as soon as there is sufficient voltage between the battery connections.

**Check the status of your battery remotely.**

- The Blue Smart IP67 charger has built-in Bluetooth. In this way, the status of the charger and the battery can be checked on a smartphone, tablet or laptop. All settings of the charger can be configured with the VictronConnect app.
