

Zenith Bolted poles AGM & Lithium batteries for M6 terminals

Zenith

Product number: Zen-901169

Bolted poles for the direct attachment of the Quick Power battery clamps.

6,90 €* 6,90 €

These handy screw terminals for all Zenith AGM & Lithium batteries are needed to directly attach the Quick Power battery clamps.

The corrosion and salt water resistant pole adapters can be used to convert batteries with M6 or M8 internal threads to the standard SAE conical pole of common battery terminals. The brass screw terminals are easily mounted on the battery using the M6 or M8 stainless steel screws supplied. The product is ideally suited for converting to AGM, GEL, Silicone or Lithium batteries.

Special features:

- Suitable for SAE standard battery terminals.
- Suitable for all battery types with M6 or M8 female thread
- Easy conversion to standard SAE pole adapters
- Corrosion and salt water resistant
- Height of cone pole: 17mm
- Material cone pole: solid brass
- Material screw: stainless steel
- Length hexagon socket screws: 25mm
- Total weight: 70.3g / set
- M6 - fine thread with 1.0mm
- M8 - standard thread with 1,25mm

Scope of delivery:

- 1 pair of cone pole adapters (+/- pole) M6 or M8
- 1 pair of stainless steel screws M6 or M8
