MINN KOTA ENDURA MAX ELECTRIC MOTOR

Digital Maximizer™

Motors with Digital Maximizer provide up to five times longer run time on a single charge by drawing only as much power as you need, so they don't waste any energy. These motors are variable speed, so dial in your precise speed and let Digital Maximizer deliver the right amount of power, while conserving your battery - extending your time on the water.

Variable Speed Control

Get better boat control by precisely dialing in your speed, instead of being limited to five preset speeds.

Telescoping Handle

Six-inch telescoping handle provides comfortable, easy steering.

Lever-Lock Bracket

10-position bracket features a quick-release lever lock and reinforced composite material that resists flexing, warping and UV damage.

Push-to-Test Battery Meter

Tells you how much battery life you have left - at the push of a button.

Power Prop

The Power Propeller delivers extra power to help you push through heavy vegetation to get you where the fish are.

Indestructible Composite Shaft

Pound for pound, our composite shaft is stronger than steel. It flexes on impact and won't break, kink or corrode. That's why we're confident enough to guarantee it for life. If we could guarantee it for longer than a lifetime, we would.

Cool, Quiet Power

Nothing runs cooler or more quietly than a Minn Kota. Our extra large windings and commutators dissipate heat, resulting in cooler operation, extended battery power, and longer motor life. And our unique bearing system reduces friction to cut fish-spooking noise. So quiet, they'll never hear you coming.

2-Year Warranty

This motor is backed up with Minn Kota's two-year warranty.
