FeelFree

Product number: FFK-OS

The FeelFree Overdrive System.

from 1.309,00 € * 1.309,00 €

FeelFree Overdrive - the new engine system for your FeelFree kayak.

This spring FeelFree will release its eagerly-awaited electronic and pedal-powered engine. It will be available for all FeelFree models with an integrated sonar pod. This applies to the models Lure 11.5, the bigger 13.5 and the new Lure 2 Tandem.

The pedal unit, made from an extremely durable aluminium cast, embodies the backbone of the complete Overdrive System and acts as installation frame for all available components and gets mounted on the sonar pod notch. All needed installation components are included in the delivery content, inclusively the seat adjuster. With the pedal engine it's finally possible to entirely concentrate on fishing, because the paddle isn't needed anymore. Even backing up is possible since the crank can be pedaled in the opposite direction. The optionally available e-motor perfectly fits into the notch of the pedal engine and you can start driving without any physical effort immediately with a maximum thrust of 40lbs (0.5 HP). On the integrated LCD display performance data like speed and state of charge can be read out and with the included cable remote the speed can be regulated manually, while the direction can be changed with the also included hand steering.

Battery and a fitting charger have to be purchased separately - battery box, cables and a kill switch are included.

The whole system can be lowered and lifted with help of the spring mechanism and in the lifted position it lines up precisely with the hull belly what simplifies the transportation of your fishing kayak a lot.

Delivery content*

- **Overdrive System Pedal engine**
 - Overdrive System with pedals
 - Mounting frame
 - Handsteering for the rudder

- Seat adjuster
- Screws
- Carrying trunk
- **Overdrive System Pedal engine and rudder kit**
