

Native Watercraft Fishing kayak Titan Propel 10.5

Native Watercraft

Product number: NWC-TP105

The all new, short version of the Titan series - with nearly all the same features like it's bigger brothers.

0,00 €* 0,00 €

Maybe there are no more effective fishing kayaks for bass fishing than the Titan models.

Equipped with the same features as the 13.5, the 10.5 is just lighter and smaller than its big brother and can be more easily transported. To add some extra flotation and to increase stiffness, our Plastifoam technology is a feature in all Titan models. This causes a higher safety and better performance. The Titan 10.5 is perfect for side casting, because the platform provides plenty of leverage to the stern while casting. The horizontal rod holders next to the adjustable 1st class seat makes the journey very comfortable.

If desired, there is the possibility to mount an electronic motor at the stern of all Titan models when a Transom-Style Motor Mount is purchased. Then you get a truly versatile, power-assisted kayak fishing platform.
